

Sales Memo from Comfort Division

Date 2002.01.10

Integrated service and replacement valves in single packs

Application

The Comfort Controls Division is introducing 4 built-in service and replacement valves in single packs. Above the relevant valves are lined up.

From left to right : Sample, then 013L0215, 013G0220, 013G0245 and 013G0270. Tech details see bottom of page.

So far the valves have been available through wholesalers in industrial packs of 130 pcs. However, picking unidentified products from large units is impractical and consequently the valves are now to be sold in single packs, this being a plastic bag containing valve with instruction in GB/D/F/NL-language, and with EAN* and barcode.

Product class

221

Stat. no.

013L0215 and 013G0220 = 03165,
013G0245 = 03166, 013G0270 = 03132

Packaging

Plastic bag with 1 unit

Multipack

Carton containing 40 Pcs

Ordering from

Danfoss Silkeborg
