Change in contents of Demounting tools

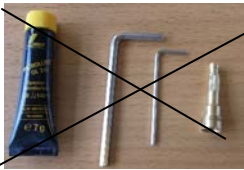

We have removed the standard tools from our demounting tools.

This means that wrenches, allenkey and the galvanised angle have been removed.

From the little spare part kit: The two small allen keys, the little grease tube,

Furthermore from the little spare part kit we have removed the stuffing box substitution as this is part of the spare part 013G3125 "RAVL catcher for gland seal"

Hook wrench has been changed to one without link

=>
