

## Sales Memo

from Danfoss Comfort Controls - PL03

Date: 2006 - 09 - 08

### New integrated service and replacement valve - 013G7315 - in single pack

#### Description

As a supplementary to the RAVL service valve 013L0215, Danfoss Comfort Controls is now introducing a new built-in service and replacement valve for RA2000 sensors.

The **013G7315** integrated valve is equipped with presetting and R $\frac{1}{2}$ " thread for M21 ratchet.

The **013G7315** integrated valve is to be sold in single packs - a plastic bag containing valve and instruction in English, German, French, Dutch and Czech language and with EAN- and barcode.
